Based in Morocco | Relocating to Canada | Canadian PR application submitted (October 2026)

PROFESSIONAL SUMMARY

Senior iOS Engineer with 8+ years of experience building and improving iOS applications for Automattic, HungerStation, and Sainsbury's. Experienced in leading projects end-to-end, from planning and architecture to implementation and delivery. Strong focus on UI craftsmanship, performance optimization, and building polished user experiences.

WORK EXPERIENCE

Senior iOS Engineer April 2026 – Present

Sainsbury's (via Mindera) *London, UK (Remote)*

One of the UK's largest grocery and general merchandise retailers.

- Shipped SmartLists for the Sainsbury's iOS app, helping customers create shopping lists from text, photos and voice input.
- Rebuilt the Argos iOS app's Order Details experience from the ground up, introducing a redesigned interface and support for purchases from third-party sellers.

Senior iOS Engineer November 2024 – March 2026

HungerStation (via Toptal) *Riyadh, KSA (Remote)*

A leading food delivery platform in Saudi Arabia.

- Owned the App Hangs initiative end-to-end, improving Hang-Free User Rate from 99.6% to 99.9% by investigating, reproducing, and fixing hang root causes across critical user flows.
- Added observability for iOS reliability and performance by shipping dashboards and alerts (error rates, hangs, and latency), enabling faster detection and safer releases.
- Improved UI test stability and reduced CI runtime by ∼50% (1h → 30m) by introducing test sharding and reducing flaky tests, improving release confidence and developer velocity.
- Led a full redesign of the Order Tracking experience and removed scroll hitches by profiling and optimizing rendering work, resulting in a noticeably smoother interaction on real devices.
- Developed Live Activities for order progress, providing real-time updates via the Lock Screen and Dynamic Island and reducing the need to reopen the app to check status.

Senior iOS Engineer Sept 2022 – June 2024

Automattic *San Francisco, USA (Remote)*

The company behind WordPress.com, WooCommerce and Jetpack.

- Designed and implemented core features for the WordPress and Jetpack iOS apps, focusing on code quality and delivering a polished user interface.
- Worked on a feature to seamlessly migrate users from WordPress to the Jetpack mobile app, resulting in over 300,000 unique users making the transition to Jetpack.
- Enhanced the Notifications screen by introducing in-line actions, resulting in a 20% increase in likes for posts and comments.
- Improved the Jetpack app's store rating from 3.48 to 4.57 through user feedback analysis and targeted feature enhancements.
- Led the development of Dynamic Dashboard Cards, enabling real-time updates driven by the backend without requiring code changes. This resulted in a 71% increase in traffic to the Domains Management screen.

iOS Engineer Sept 2021 – Aug 2022
Liven (via Toptal) · Part-time *Melbourne, Australia (Remote)*
A dining payments and rewards platform for restaurants and customers.

- Developed and redesigned features for the Liven iOS app, helping users earn dining rewards across Australia.
- Collaborated with design to build a Design System and improve consistency across the app.
- Improved app stability and scrolling performance by fixing critical bugs and profiling with Xcode Instruments.

Software Engineer Jul 2018 – Aug 2022
Gemography *Rabat, Morocco (Hybrid)*
A software engineering company connecting remote developers with global tech teams.

- Maintained and enhanced iOS apps for clients, including migrating the Schneider Electric app from Objective-C to Swift to improve maintainability.
- Developed Startup Patterns, an iOS app delivering bite-sized startup lessons to entrepreneurs, which ranked #1 Product of the Day on Product Hunt.
- Automated hiring workflows using serverless technologies, reducing time-to-hire by 25%.

TECHNICAL SKILLS

iOS Development	Swift, Objective-C, SwiftUI, UIKit, Combine, Core Animation, Grand Central Dispatch
Quality & Performance	Xcode Instruments, Performance Profiling, Observability, Unit Testing, UI Testing
Tools & CI/CD	Git, Fastlane, Bitrise, GitHub Actions, Firebase, Sentry
Backend & Other	REST, GraphQL, TypeScript, Node.js, Docker, AWS Lambda, Python, PostgreSQL

EDUCATION

M.Sc. Software Engineering 2015 - 2018
High National School for Computer Science and Systems Analysis (ENSIAS) *Rabat, Morocco*
