PERSONAL STATEMENT

Senior iOS Engineer with 8+ years of experience building polished, user-centered iOS apps. Most recently worked at HungerStation, Saudi Arabia's leading food delivery platform and part of the Delivery Hero network. Previously worked at Automattic (WordPress.com and WooCommerce), contributing to key features across the WordPress and Jetpack iOS apps. Cares deeply about crafting intuitive, delightful user experiences backed by clean, well-structured code.

WORK EXPERIENCE

Senior iOS Engineer

HungerStation (via Toptal)

November 2024 – March 2026

Riyadh, KSA (Remote)

- Owned the App Hangs initiative end-to-end, improving Hang-Free User Rate from 99.6% to 99.9% by investigating, reproducing, and fixing hang root causes across critical user flows.
- Added observability for iOS reliability and performance by shipping dashboards and alerts (error rates, hangs, and latency), enabling faster detection and safer releases.
- Improved UI test stability and reduced CI runtime by ~50% (1h → 30m) by introducing test sharding and reducing flaky tests, improving release confidence and developer velocity.
- Led a full redesign of the Order Tracking experience and removed scroll hitches by profiling and optimizing rendering work, resulting in a noticeably smoother interaction on real devices.
- Developed Live Activities for order progress, providing real-time updates via the Lock Screen and Dynamic Island and reducing the need to reopen the app to check status.
- Technologies: Swift, UIKit, SwiftUI, XCTest, UI Tests, Bitrise, Fastlane, MVVM, Sentry, Firebase, Git.

Senior iOS Engineer

Automattic

Sept 2022 – June 2024

San Francisco, USA (Remote)

- Designed and implemented core features for the WordPress and Jetpack iOS apps, focusing on code quality and delivering a polished user interface.
- Worked on a feature to seamlessly migrate users from WordPress to the Jetpack mobile app, resulting in over 300,000 unique users making the transition to Jetpack.
- Enhanced the Notifications screen by introducing in-line actions, resulting in a 20% increase in likes for posts and comments.
- Improved the Jetpack app's store rating from 3.48 to 4.57 through user feedback analysis and targeted feature enhancements.
- Led the development of Dynamic Dashboard Cards, enabling real-time updates driven by the backend without requiring code changes. This resulted in a 71% increase in traffic to the Domains Management screen.
- Fixed critical bugs, contributing to hitting the targets for Crash-Free Users and Crash-Free Sessions metrics for both the Jetpack and WordPress apps, enhancing overall app stability.
- Acted as project lead on various initiatives, responsible for scoping projects, conducting technical analysis, providing estimates, breaking down tasks, and publishing weekly reports and updates.
- Migrated legacy Objective-C code to Swift, modernizing the codebase and improving maintainability.
- Technologies: Swift, Objective-C, UIKit, SwiftUI, Core Data, Combine, XCTest, Fastlane, MVVM, Git.

Senior iOS Engineer

Liven (via Toptal) · Part-time

Sept 2021 – Aug 2022
Melbourne, Australia (Remote)

- Contributed to the development of the Liven iOS app, helping users earn rewards when dining across Australia.
- Collaborated with design to build a Design System and improve consistency across the app.
- Redesigned features, fixed critical bugs, and improved app stability.
- Resolved a scrolling hitch issue using Xcode Instruments, resulting in a smoother user experience.
- Technologies: Swift, UIKit, SwiftUI, Xcode, Fastlane, New Relic, Firebase.

Software Engineer

Gemography

Jul 2018 – Aug 2022
Rabat, Morocco (Hybrid)

- Built and maintained iOS apps for clients, including helping migrate the Schneider Electric app from Objective-C to Swift to improve maintainability and support future development.
- Built Startup Patterns, a mobile app that reached the #1 spot on Product Hunt.
- Built serverless hiring automation tools that reduced time-to-hire by 25%.
- Developed data pipelines and analytics dashboards to track core business KPIs.
- Led the design and launch of a web-based technical assessment platform.
- Technologies: Swift, UIKit, Objective-C, TypeScript, Node.js, GraphQL, Docker, Python, PostgreSQL.

SKILLS

Proficient	iOS, Swift, UIKit, SwiftUI, Xcode, Combine, Grand Central Dispatch, Core Animation, Fastlane, Bitrise, Github Actions, Unit Testing, UI Testing, Git
Experienced in	GraphQL, REST, TypeScript, Node.js, Docker, AWS Lambda, MongoDB
Familiar with	Python, PostgreSQL, Ruby on Rails, Prefect, Data Engineering

EDUCATION

M.Sc. Software Engineering

High National School for Computer Science and Systems Analysis (ENSIAS)

2015 - 2018
Rabat, Morocco
